产品宣传册 / 中英双语

流化床焚烧系统

采用气流使床料保持流化，对适合该流程的污泥、工业废物或固体燃料进行热处理。

产品图示

结构与工艺接口

系统方案需同时考虑预处理及给料、床层和风量控制、余热接口、灰渣处理及烟气净化边界。

选型与询价资料

01	来料组成、含水率、热值与波动
02	给料状态
03	运行安排
04	余热利用、灰渣和烟气处理条件。

PRODUCT BROCHURE / CHINESE AND ENGLISH

Fluidized Bed Incineration System

Air fluidizes the bed material for thermal treatment of suitable sludge, industrial waste or solid fuel.

Product illustration

Configuration and process interfaces

The system discussion covers feed preparation, bed and air control, heat-recovery interfaces, ash handling and flue-gas treatment boundaries.

Information for selection and inquiry

01	Feed composition, moisture, heating value and variation
02	feed condition
03	operating schedule
04	heat recovery, ash and flue-gas treatment conditions.
